2. What is 3D Secure?

- 3D Secure is a payment authentication standard for internet purchases which adds an extra layer of security when purchasing goods or services online with participating retailers. Visa calls its version Verified by Visa. Mastercard calls its version Mastercard® SecureCode™.
- 3D Secure is an extra security feature of your debit and/or credit card (Card) and is not intended to replace security obligations in the terms and conditions of your Card.

3. Acceptance of these Terms of Use

- Use of 3D Secure will represent your acceptance of these Terms of Use.
- These Terms of Use should be read together with the terms and conditions of your Card.

4. How does 3D Secure work?

- You do not need to register your Card.
- When purchasing online from a participating retailer and authentication is required, you will be brought to a Mastercard SecureCode or Verified by Visa screen.
- You'll be prompted to enter a one-time passcode (passcode) sent to your mobile phone by text message (SMS) to complete your purchase. You have a set amount of time and a number of attempts to enter the passcode correctly. If you do not enter the passcode correctly, you will be unable to complete your online purchase.
- The passcode will only be valid for the online purchase you have received it for.
- To enable you to use 3D Secure you should make sure that the personal information we hold for you (in particular your mobile phone number) is up-to-date. For assistance, please call our 3D Secure team on 0818 200 370, or +353 1 2500370 if you're calling from abroad.
- We do not charge for 3D Secure. However, you are responsible for SMS fees charged by your mobile phone provider and any internet fees when shopping online with a participating retailer.

5. What do I need to use 3D Secure?

- To use 3D Secure:

- ▶ you must have internet access
- ▶ you must have a mobile phone
- ▶ we must have your correct mobile phone number and
- ▶ your mobile phone must be able to receive the passcode SMS.
